

The Pet Rescue Foundation

Maddie's Fund[®] Community Grants Program

Attachment I: Shelter Categories

For the purposes of this application, there are three categories of organizations: (1) Animal Control (AC); (2) Traditional (TR); and (3) Adoption Guarantee (AG).

- **Animal Control (AC):** Municipal agencies or animal organizations that contract with local governments to provide animal control services.
- **Traditional (TR):** Animal organizations that manage shelter populations by euthanizing pets that are considered to be healthy or treatable in addition to unhealthy & untreatable animals. If a traditional shelter has a contract with local government to provide animal control services, please include this organization in the Animal Control category.
- **Adoption Guarantee (AG):** Animal organizations that save all the healthy and treatable animals under their care, with euthanasia reserved only for unhealthy & untreatable animals. An adoption guarantee organization could be an animal shelter, rescue group, foster care organization, or sanctuary.

An animal organization does not have to call itself an adoption guarantee organization, but it does have to: (1) save all healthy and treatable animals under its care and make public its commitment to doing so; (2) clearly articulate to its community that it is saving all healthy and treatable animals under its care; (3) use the definitions of healthy and treatable as described by the Asilomar Accords; and (4) publish, at least annually, in the organization's primary publications and on its website, the organization's shelter statistics, including the number of live intakes, adoptions, redemptions, transfers, died in kennel, and euthanasia, including owner-requested euthanasia.

Attachment II: Categories/Definitions of Shelter Animals

Healthy: The term “healthy” means and includes all dogs and cats eight weeks of age or older that, at or subsequent to the time the animal is taken into possession, have manifested no sign of a behavioral or temperamental characteristic that could pose a health or safety risk or otherwise make the animal unsuitable for placement as a pet, and have manifested no sign of disease, injury, or congenital or hereditary condition that adversely affects the health of the animal or that is likely to adversely affect the animal’s health in the future.

Treatable: The term “treatable” means and includes all dogs and cats who are “rehabilitatable” and all dogs and cats who are “manageable.”

Rehabilitatable: The term “rehabilitatable” means and includes all dogs and cats who are not “healthy,” but who are likely to become “healthy,” if given medical, foster, behavioral, or other care equivalent to the care typically provided to pets by reasonable and caring pet owners/guardians in the community. (Treatable-rehabilitatable conditions are generally considered to be curable.)

Manageable: The term “manageable” means and includes all dogs and cats who are not “healthy” and who are not likely to become “healthy,” regardless of the care provided; but who would likely maintain a satisfactory quality of life, if given medical, foster, behavioral, or other care, including long-term care, equivalent to the care typically provided to pets by reasonable and caring pet owners/guardians in the community; *provided, however*, that the term “manageable” does not include any dog or cat who is determined to pose a significant risk to human health or safety or to the health or safety of other animals. (Treatable-manageable conditions are generally considered to be chronic.)

Unhealthy & Untreatable: The term “Unhealthy & Untreatable” means and includes dogs and cats who, at or subsequent to the time they are taken into possession,

1. have a behavioral or temperamental characteristic that poses a health or safety risk or otherwise makes the animal unsuitable for placement as a pet, and are not likely to become “healthy” or “treatable” even if provided the care typically provided to pets by reasonable and caring pet owners/guardians in the community; or
2. are suffering from a disease, injury, or congenital or hereditary condition that adversely affects the animal’s health or is likely to adversely affect the animal’s health in the future, and are not likely to become “healthy” or “treatable” even if provided the care typically provided to pets by reasonable and caring pet owners/guardians in the community; or
3. are under the age of eight weeks and are not likely to become “healthy” or “treatable,” even if provided the care typically provided to pets by reasonable and caring pet owners/guardians in the community.
